

A close-up photograph of several green leaves, likely from a plant like helleborus, covered in a thick layer of white frost or snow. The leaves are vibrant green and have a lobed, serrated appearance. The frost is piled up on the surface of the leaves, creating a textured, crystalline look. The background is dark, making the green leaves and white frost stand out prominently.

*Wir wünschen Ihnen schöne Festtage,
viel Glück und alles Gute im Neuen Jahr!*
